Green Buildings Open House Tour 2023

Biosphere, Sponsor Showcase

Sat, June 3, 11 am - 4 pm

WHY IS THE BIOSPHERE INSTITUTE OFFICE ON THE TOUR?

The Biosphere will take this opportunity to showcase some of our relevant programming, including launching our brand-new Home Energy Evaluation Toolkits!

We will also open our doors to the GBOH event sponsors to showcase their products and services, a great place to talk to an expert!

HOME ENERGY EVALUATION TOOLKIT

The ready-to-use Home Energy Evaluation Toolkits include the items needed to assess four key areas of energy use in Alberta homes: Heating & Cooling; Water Heating; Appliances; and Lighting. A step-by-step instruction manual and link to an instructional video explaining how to use each of the tools to assess energy use and what steps to take to increase energy efficiency and reduce energy costs.

These kits will be hosted at each Bow Valley local library and be available to loan for free. Come check out the applicability of this great resource!

SPONSOR SHOWCASE

As thanks to our sponsors for helping to keep this a free tour we are offering them the opportunity to showcase their related products and services they offer in our community in our Sponsor Showcase.
